Proofpoint Essentials
Comparison with McAfee SaaS Email Protection & Continuity

As Intel Security exits the email security market, small and medium businesses find themselves in need of a state–of–the–art alternative. Proofpoint Essentials delivers an immediate and seamless transition to better email security. McAfee Email Security customers affected by the end–of–life of their email security solution can upgrade to Proofpoint Essentials today.

Delivered through 4 tailored packages, Proofpoint Essentials protects enterprises from email threats including phishing, malware, spam, and other forms of objectionable or dangerous content with an email security solution designed for SMEs. This cloud based enterprise–class Email Security, Continuity, Encryption & Archiving product is backed by Proofpoint's best–of–breed security & infrastructure and provided at a price that delivers value and cost–savings.
