Company and Services Overview

Who We Are
A Brief Overview

Intelligent Audit is a leading technology services company focused on reducing transportation costs through automated audit and freight recovery, business intelligence, and contract optimization solutions.

Our cloud-based solution addresses customer needs using data-driven analytics and reporting to identify trends, examine current business activities and processes, and detect areas for improvement and optimization.

Intelligent since 1996.

Quick Facts...

- Intelligent Audit was the **first** company to introduce a small package e-bill audit solution to the marketplace and we continue to be the **innovator and leader** in the industry with **our proprietary technology**.

- We manage **over $8 Billion** in transportation freight costs

- We support *more than 2,500* global customers

- We integrate with **over 3,000** global, regional and local carriers of all transportation modes

- We process **millions** of transactions every day – 24 hours a day, 365 days of the year

- We provide transportation visibility and capture transaction data *both domestically and internationally*

Our Proven Approach

Freight Audit & Recovery

» Investigate and recover opportunities regardless of dollar amount
» Automated dispute submission and resolution tasks
» Create systematic processes to drive efficiencies and increase cost savings

Business Intelligence & Analytics

» Visualize and analyze complex data
» Deliver attractive, customizable reports for internal /external use
» Drive *proactive* rather than *reactive* strategies using BI and analytics tools
» Bring data into common alignment within diverse departments

Contract Optimization

» Analyze carrier contracts and determine cost reduction opportunities
» Identify areas of improvement and optimize current contracts
» Simplify management and reduce risk with the support of IA advisors

Finance & Accounting

» Effectively manage GL coding and cost center allocation entries
» Automate freight remittance processes
» Multi-currency report and payment functionality
» Ensure accuracy of international transactions with multi-currency functions
» Track / monitor accruals and landed costs
