# About

This document has been designed to provide you with an overview of new and enhanced capabilities delivered with Sage X3 Version 12 2022 R3 quarterly update release. For a full description of the new features and enhancements delivered with this release please refer to the What's New section of the [Sage X3 Online help center](#).

# Finance

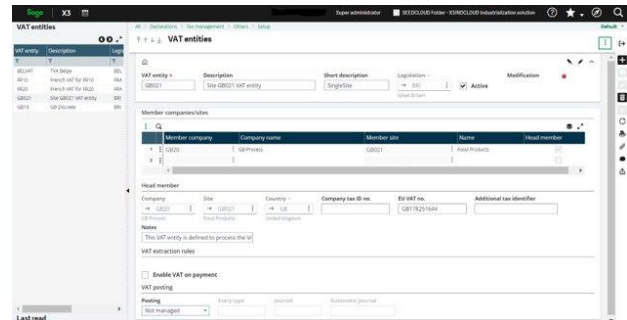

## General

### SEPA updated to v3.5

Bank file definitions for SEPA files for credit transfers and direct debit have been upgraded to version 3.5 in compliance with Deutsche Kreditwirtschaft requirements and the Electronic Banking Internet Communication Standard.

### VAT Framework – Improvements

For a simplified experience, you can select the Enable VAT on payments checkbox to display the related fields in the VAT returns function. If this checkbox is not selected, the fields are hidden.

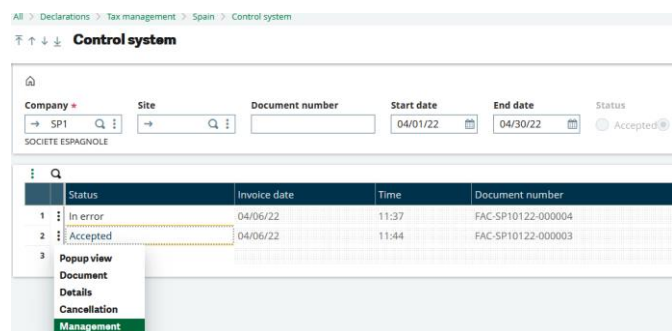

# Compliance

## Portugal

### ATCUD communication via web services

To remain compliant, you can now use web services to communicate ATCUD codes directly with the Portuguese fiscal authorities. You are able to register, cancel, finalize, or review a series and still have the option to generate and submit manually.

## Spain

### TicketBAI changes

For Spanish business operating in the Gipuzkoa and Alava territories, you can modify certain information in the TicketBai files for outbound or cancelled invoices. This option is available in the Control system function using the Management option from the Action icon on the line.

# Distribution

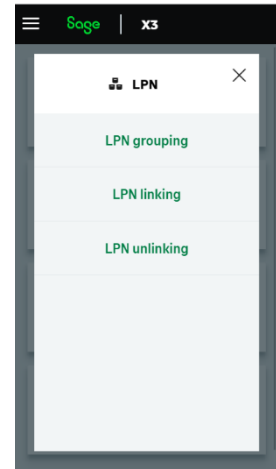

## Sage X3 Mobile Automation

### Purchase receipt transaction

In the Purchase receipt transaction, you can search a product using the product supplier code or the supplier UPC code.

### Unlink an LPN

You can now use the LPN unlinking transaction to unlink stock lines from a License plate number.

# Manufacturing

## Sage X3 Mobile Automation

### Time tracking

For an improved user experience, a new Mobile Automation Time tracking transaction has been enhanced to track time for an unplanned operation. A Standard operation can also be selected as an unplanned operation.

### Material consumption enhancements

The Mobile Automation material consumption functionality has been enhanced to only display lots and sublots available in stock when selecting lots and sublots for a component.

## Sage X3 Web Scheduling

### New sedApta version : 2022

This release introduces a new brand interface with a simpler installation package.

For preinstallation recommendations please visit the [Sage X3 Online help center](#).

# Platform

To enhance your user experience, a number of add-ins have been delivered with the Sage X3 platform, including:

## Notification server

Notification server screen enhancements have been made, there are also new transport types for the notification server and workflow emails.

## File Uploads - Invalid Characters

To improve accuracy and save time, an error displays when you upload files with invalid characters.

## API's

### GraphQL API

Enhancements have been made to the Sage X3 GraphQL schema to add various nodes and properties, find below. For more information and supporting materials, [please click here](#).

- Attribute values for Finite scheduler
- Finite scheduler custom values
- Managing deletions for Finite scheduler
- Optimization matrices for Finite scheduler
- Setup matrix for Finite scheduler
- Setup time exception lines for Finite scheduler
- Work order link for Finite scheduler
- Time Entry Line (mutation)

# Sage X3 Automated Test Platform

Enhancements have been made to the Sage X3 Automated Test Platform version 2.8.0 for your user experience, this contains:

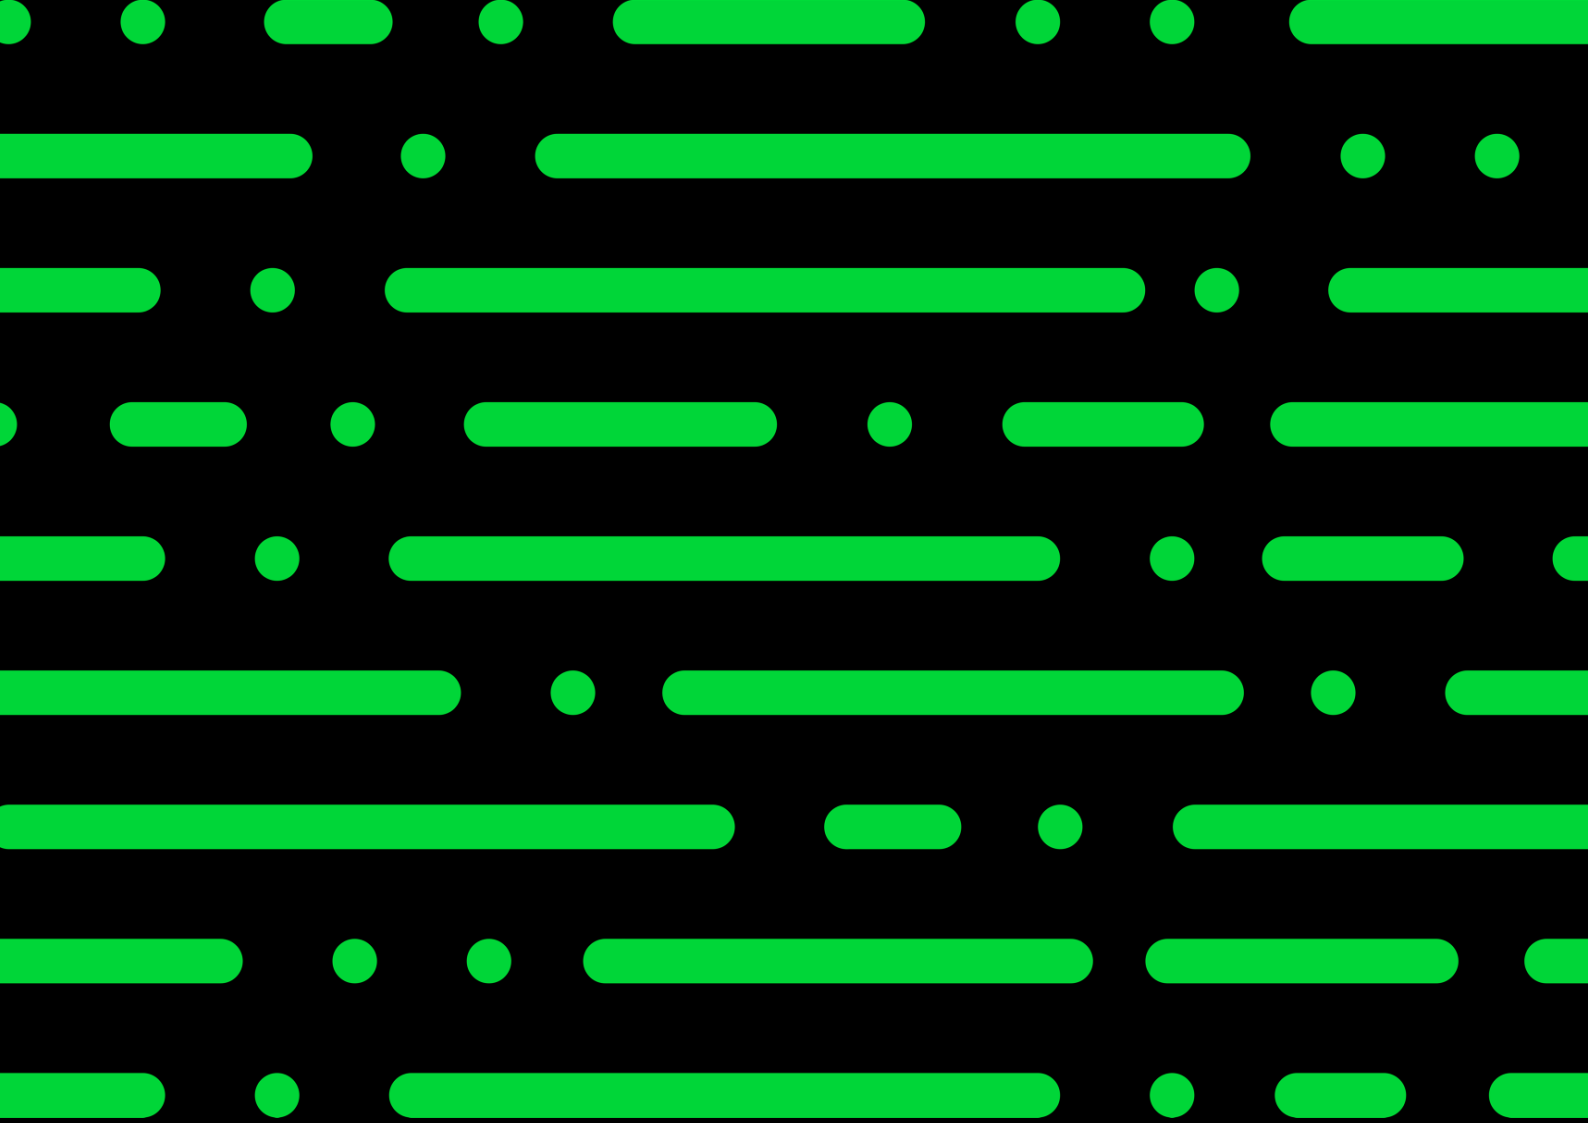

- Screenshots on demand
- Platform installation and update using a new setup wizard to install and update the Sage X3 Automated Test Platform library
